

MARCOS BARAVALLE

FULL STACK WEB DEVELOPER

3+ years of experience as web developer, specializing in frontend development. Proven ability to build modern, performant web applications using React and Next.js, with a strong eye for UX and advanced visual interactions through GSAP and Three.js. Collaborative by nature, I adapt quickly to new challenges and take ownership of code quality, always delivering maintainable and scalable solutions.

MOST RECENT WORK EXPERIENCE

Fullstack Developer at Abstract (Freelance Collective)

Jan 2024 – Present · Remote · Web Development, Freelance / B2B

RESPONSIBILITIES

- Own the full development lifecycle of web applications, from architecture decisions to production deployment, ensuring scalability, maintainability, and alignment with business requirements.
- Craft high-performance frontend experiences using React and Next.js, implementing advanced animations and 3D interactions with GSAP and Three.js to elevate user engagement beyond standard interfaces.
- Collaborate closely with design-driven requirements, translating visual and UX specifications into responsive, accessible, and cross-browser-compatible implementations.

KEY ACCOMPLISHMENTS

- Delivered 10+ production-ready projects across 2 clients with an average turnaround of 3 weeks, maintaining consistent quality standards through a scalable component-based architecture.
- Expanded the team's technical offering by introducing 3D and animation-heavy frontend patterns (GSAP, Three.js), enabling the collective to take on more complex, higher-value client projects.

React Developer - Tech Lead at Notimation

Oct 2023 – Nov 2024 · Remote · SaaS, B2B / Product

RESPONSIBILITIES

- Contributed to the architecture and development of UiTool, an AI-driven drag-and-drop platform enabling users to build PWAs, landing pages, email templates, and payment workflows at scale.
- Designed and integrated AI-powered chatbots tailored to user needs, streamlining cart management, order flows, and overall e-commerce experience.
- Led a four-person frontend team in the end-to-end development of UiTrade, a marketplace for buying and selling designs and marketing campaigns.
- Owned frontend architecture decisions, code review processes, and repository standards, establishing development workflows that ensured quality, scalability, and maintainability across the codebase.

KEY ACCOMPLISHMENTS

- Improved e-commerce conversion rate by ~22% by integrating an AI-powered chatbot into UiTool's ordering flow, validated through internal A/B testing.
- Delivered UiTrade's MVP in 6 weeks leading a team of 4, with test coverage on all critical components.
- Reduced production bugs by ~45% between month 1 and month 3 by establishing code review workflows and architecture standards from the ground up.

SKILLS

- **Frontend:** React, Next.js, GSAP, Three.js, Tailwind CSS, Material UI, Chakra UI, Redux Toolkit.
- **Backend:** Node.js, Express.js, NestJS, MongoDB, Prisma, SQL.
- **DevOps & Tools:** Claude Code, Github Copilot, Git, GitHub, Vercel, Netlify, Render, Hostinger, Railway.
- **Web concepts:** REST APIs, JWT Authentication, SEO, PWAs.
